

With exposed heating coils for optimal heat transfer, large insertion depth, wide fusion zones plus cold zones at the end and in the middle to prevent the flow of molten material, for use without holding devices. With separate fusion

zone and one indicator per fusion zone for visual fusion control.

With pre-heating technology (d 400 – d 450 optional use; d 500 – d 630 required).

Special sizes, pressure stages and designs on request

PE 100 SDR 9

Maximum working pressure 20 bar (water)
